

A photograph showing a person's hand holding a green citrus fruit, likely a lime or lemon, on a tree. The background is a blurred green, suggesting a lush orchard or farm setting. The text "100% Natural Crop Enhancements" is overlaid in a large, bold, yellow-green font across the center of the image.

100% Natural Crop Enhancements

The Role Of KIKO Technology™

IS 100% NATURAL, NON-CHEMICAL & NON-BIOLOGICAL

KIKO capsules are charged volcanic stones, formulated to restore water's natural harmonics.

LASTS LONG

Our patented processing of these inorganic materials stabilize and prolong their effectiveness for up-to 5 years.

SPEEDS NUTRIENT ABSORPTION

Our technology breaks down surface tension between water molecules and other substances allowing for faster nutrient absorption and faster toxin discharge.

INCREASES PLANT GROWTH

Amongst many effects, by stabilizing pH levels and electrical conductivity (*EC*), plants can rely on less fertilizer and chemicals.

INCREASES WATER'S FIR POTENTIAL

Far-infrared (*FIR*) is sun energy, it is responsible for growth, healing & regeneration in living organisms. Regular water absorbs 4-10% of FIR, KIKO increases water's absorption up to 70%.

KIKO Effect On Soil Health

Lucerne Cotton Farm
NSW, Australia, 2015

Soil & Plant Analysis Laboratory

1- pH stabilized at 6.5 with KIKO from previous 6.7
2- EC increased to 1.151 dS/m with KIKO from previous 1.084 dS/m
